Master's Student, Kuroda Laboratory, Department of Biological Sciences,
Graduate School of Science, The University of Tokyo

Biosketch

I am currently a master's student in the Kuroda Laboratory at The University of Tokyo. Using graded obesity mice, I aim to clarify how metabolic regulation changes as obesity progresses.

I received my B.A. in Environment and Information Studies from Keio University in 2025. During my undergraduate years at Keio University, I worked at the Laboratory for Integrated Cellular Systems, RIKEN. There, I developed a method for estimating key molecules in transcriptional regulatory networks. This project was also selected as an Outstanding Graduation Project at the university.

Since 2023, I have been working as a data scientist at Epistra Inc. I analyze clients' omics data and also develop methods for automatically generating experimental designs. My research interests lie in systems biology, omics data analysis, and data-driven approaches to understanding biological systems.

Education

2025.04–Today **The University of Tokyo**
Graduate School of Science, Department of Biological Sciences
- Master's Program
- Supervisor: Shinya Kuroda

2021.04–2025.03 **Keio University**
Faculty of Environment and Information Studies
- B.A. in Environment and Information Studies
- Supervisor: Katsuyuki Yugi

2018.04–2021.03 **Keio Shiki Senior High School**

Career

2025.04–Today **The University of Tokyo**
Kuroda Laboratory, Department of Biological Sciences, Graduate School of Science
- Master's Student

2023.08–Today **Epistra Inc.**
- Data Scientist (Intern)

2022.05–2025.03 **RIKEN Center for Integrative Medical Sciences (IMS)**
Laboratory for Integrated Cellular Systems
- Student Trainee

Review Articles

2026.03 Tsuzuki T, **Okada Y**, Maruyama J, Kim H, Ozawa Y & Yugi K
AI-driven knowledge mining to break the 'cognitive bottleneck': autonomous exploration of the 'next move' in individual-molecule analysis
Jikken Igaku (Experimental Medicine) Supplement 44(5): 51–59, Yodosha (in Japanese)

Presentations

2026.10 **Okada Y**, Morita K, Maehara H, Soga T & Kuroda S
Capturing Changes in Metabolic Regulation During Obesity Progression Using Graded Obesity Mice
20th Metabolome Symposium, 1P-01W, Tsuruoka, Japan (poster)

2026.09 **Okada Y**, Morita K, Maehara H, Soga T & Kuroda S
Metabolic Regulatory Network Changes During Obesity Progression in Graded Obesity Mice
CREST Research Area "Development of Technology Platforms for Quantitative Analysis of Spatiotemporal Multicellular Interaction", Young Researchers' Meeting 2026
P2, Kyoto, Japan (poster)

2026.06 **Okada Y**, Morita K, Maehara H, Soga T & Kuroda S
Metabolic Regulatory Network Alterations During Obesity Progression in Graded Obesity Mice
25th University of Tokyo Life Science Symposium, P175, Tokyo, Japan (poster)

2024.11 **Okada Y**, Tsuzuki T, Zhu Q, Maruyama J, Ozawa Y & Yugi K
Construction of the Method for Estimating Key Molecules From Transcriptional Regulatory Networks
CREST Research Area "Innovation in Life Science Research through Data-/AI-driven Digital Transformation", Interim Report Symposium, Tokyo, Japan (poster)

Awards

2026.03 **aihack Special Award**
AIFUL Group
- Competition on machine-learning models predicting credit-card payment defaults

2025.03 **Silver Award, 25th Keio SFC Academic Society Meeting (KEIO-SAS)**
Keio SFC Academic Society
- "Optimal solutions from a vast molecular space: key-molecule estimation in transcriptional regulatory networks"

2025.03 **Outstanding Graduation Project, Fall Semester 2024**
Keio University Shonan Fujisawa Campus
- "Construction of a key-molecule estimation method in transcriptional regulatory networks"

2024.04 **Excellence Award, Term Paper (Fall Semester, AY2023)**
SFC Bio (Advanced Biosciences), Keio University
- Awarded based on the term paper, a report summarizing that semester's research results

2022.10 **Encouragement Award, Term Paper (Spring Semester, AY2022)**
SFC Bio (Advanced Biosciences), Keio University
- Awarded based on the term paper, a report summarizing that semester's research results

Teaching & Outreach

2026.07 **Talk: "Obesity viewed from the world of molecules"**
10 Minutes to Tell You! Frontiers of UTokyo Research @ The University of Tokyo Hospital
- Research outreach for patients, visitors, and hospital staff

2026.05 **Talk: "Is being thin the same as being healthy?"**
10 Minutes to Tell You! Frontiers of UTokyo Research (The 99th May Festival)
- Research outreach for the general public

2026.02 **Completed the University of Tokyo Future Faculty Program (UTokyo FFP)**
Center for Research and Development of Higher Education, The University of Tokyo
- A program to develop teaching skills for university faculty

Languages

2026.03 **TOEIC Listening & Reading 910**

2024.02 **TOEFL iBT 85**
